How can we help you and your child learn and it be engaging but also manageable?

Using the Education city website, we think that your child will be able to have a little practice at a skill or new idea, then be able to use the activity sheets that we have already downloaded and put together in one pack for the whole week which includes a reading, writing, maths and science opportunity for each day. We can also download the answer sheets and have put these together as a pack.

ADAPT THIS TO FIT INTO YOUR CIRCUMSTANCES.

HELP! My child has not got a log on - All year 5 children got a home user pass before we had to close school – email us if your child can't find it and we can send it out.

In addition to this, each week we have also included some other learning opportunities that some of your children may want to do. <u>Whatever is happening for you while you are away, do email us and let us know how things are going, we'd really appreciate some feedback if you get the chance.</u>

AND REMEMBER AS WE SAID IN OUR UPDATE (26.3.20) "WHILST CONTINUING WITH LEARNING IS IMPORTANT, WE WOULD ASK THAT YOU DO NOT PUT YOURSELF UNDER UNDUE PRESSURE."

Week 1 overview – Space and the Ancient Greeks themed (ish) plus place value (what's a number worth)

-		To know about the movement of the su the sky and the effect this has on shade	High Noon	Science	5

The More Open tasks for this week - remember no need to put yourselves under undue pressure

Create a sundial – template in this week's pack

Now using the sellotape, stick the bottom of the gnonom to the base of the sundial.

The gnomon should stand up by itself, but you may need to secure it with some more sellotape at its base.

Find north with the compass - you'll need to slowly turn in a circle until the pointer points north.

Once you find north, place the sundial on a flat surface and line up the arrow on the top of the sundial so it points north. Make sure the sun is shining!

You should now be able to tell the time!

You can make this sundial with different coloured paper or make it stronger by sticking the templates on to card (old flattened cereal box)

Fancy a trip into Space?

At the back of the pack are details about Virgin Galactic and Space travel as tourism! Take a look through the details and see what you think. These resources came from "Picture News" and we thought they fitted rather well with this week.

SHARE with us (email in pictures) of any planet research that you carry out at home or any diaries that are written about a flight on the Virgin Galactic.

Many thanks and best wishes,

The Year 5 team
