

Dear Parents,

We hope you had a great half term break. The children have started this half term with Science Week-'It's a Phenomenon!'- and have taken part in a number of exciting experiments and activities including being nature detectives and a visit from a Science magician! This week's homework is based on the children's learning. Photos of the week can be found from the "latest news" section of the website on the front page.

Best wishes,

Mr Rundle

Mrs Candy

Mrs Bowditch

## Home Learning

To create a **Science poster** or a **piece of writing** that demonstrates something you have learnt this week. The pictures below might help you to remember the activities you have done this week. Underneath the pictures there are some key words that you might like to use. The poster needs to include some clear words on it and any labels that may be needed – it is not a picture only!

You might want to write about your favourite experiment or activity or you might prefer to write about one that you have learnt the most from, the choice is yours!

Nature Detective    Taking in    Giving out    Leaves    mini beasts    celery experiment    water    soil  
 Carbon Dioxide    geraniums    yeast    water    sugar    trees    predicting    explaining    recording  
 Observing    learning    pond weed    bubbles

Act of Worship theme next week:  
Curiosity

Article 13 – Every child must be free to say what they think and to seek and receive all kinds of information, as long as it is within the law.

## Home: School Communication
