**One Family – Achieving more together**

## ADMINISTRATION OF MEDICINE POLICY

At St Mary's CE Junior School, we believe that children learn best in a happy, secure and orderly environment because of their own positive attitude and that of the adults and children around them.

At St Mary's our core Christian Value is Love. In our school this is described in terms of being One Family, where each member is encouraged to love and respect themselves and others. At the centre of all that we do at St Mary's is that we are all created in the image of God; that we are all individuals and that we are treated equally.

### **Policy Statement**

St Mary's CE VA Junior School will undertake to ensure compliance with the relevant legislation and guidance with regard to procedures for supporting children with medical requirements, including managing medicines. Responsibility for all administration of medicines at St Mary's CE VA Junior School is held by Mrs G Lillywhite, who is the responsible manager and by Mr A Gibbs in her absence.

It is our policy to ensure that all medical information will be treated confidentially by the responsible manager (Gemma Lillywhite) and staff. All administration of medicines is arranged and managed in accordance with Local Authority and DFE guidance. All staff have a duty of care to follow and co-operate with the requirements of this policy.

### **Aims & Objectives**

Our administration of medicine requirements will be achieved by:

- Establishing principles for safe practice in the management and administration of:
  - prescribed medicines
  - non-prescribed medicines
  - maintenance drugs (e.g. asthma, diabetes medication)
  - emergency medicine
- Providing clear guidance to all staff on the administration of medicines
- Ensuring that there are sufficient numbers of appropriately trained staff to manage and administer medicines
- Ensuring that there are suitable and sufficient facilities and equipment available to aid the safe management and administration of medicines
- Ensuring the above provisions are clear and shared with all who may require them

Ensuring the policy is reviewed periodically or following any significant change which may affect the management or administration of medicines

### **Administration**

The administration of medicines is the overall responsibility of the parents. The Headteacher is responsible for ensuring children are supported with their medical needs whilst on site, and this may include managing medicines where appropriate and agreed with parents.

### **Routine Administration**

Prescribed medicines

- It is our policy to manage prescribed medicines (eg. antibiotics, inhalers, emergency inhaler) where appropriate following consultation and agreement with, and written consent from the parents

## Non-prescribed medicines

- It is our general policy not to take responsibility for the administration of non-prescribed medicines, (eg. Calpol or cough mixtures provided by the parents) as this responsibility rests with the parents
- On occasions when children require paracetamol it is our policy to administer providing that written consent from the parents has been received in advance.
- Children under 16 years old are never to be administered aspirin or medicines containing Ibuprofen unless prescribed by a doctor
- Responsibility for decision-making about the administration of all non-prescribed medicines will always be at the discretion of the responsible manager (Gemma Lillywhite) who may decide to administer under certain miscellaneous or exceptional circumstances

## Maintenance drugs:

- It is our policy to manage the administration of maintenance drugs (eg. Insulin) as appropriate following consultation and agreement with, and written consent from the parents. On such occasions, a health care plan will be written for the child concerned.

## Non-Routine Administration

### Emergency medicine

- It is our policy (where appropriate) to manage the administration of emergency medicines such as (for example):
  - Injections of adrenaline for acute allergic reactions
  - Emergency medicine for major fits
  - Injections of Glucagon for diabetic hypoglycaemia
  - Schools emergency inhaler
- In all cases, professional training and guidance from a competent source will be received before commitment to such administration is accepted

## Procedure for Administration

When deciding upon the administration of medicine needs for children we will discuss this with the parents concerned and make reasonable decisions about the level of care required.

Any child required to have medicines will have an 'administration of medicines/treatment' consent form completed by the parent and kept on file.

Individual health care plans will be completed for children where required and reviewed periodically in discussion with the parents to ensure their continuous suitability.

For any child receiving medicines, a 'record of prescribed medicines' sheet will be completed each time the medicine is administered and this will be kept on file.

If a child refuses to take medication the parents will be informed the earliest available opportunity.

## Contacting Emergency Services

When a medical condition causes the child to become ill and/or requires emergency administration of medicines, then an ambulance will be summoned at the earliest opportunity.

## Medical Accommodation

The room adjacent to the main reception will be used for medicine administration/treatment purposes. The room will be made available when required.

## Training

Where staff are required to carry out non-routine or more specialised administration of medicines or emergency treatment to children, appropriate professional training and guidance from a competent source will be sought before commitment to such administration is accepted.

A 'staff training record' sheet will be completed to document the level of training undertaken.

Such training will form part of the overall training plan and refresher training will be scheduled at appropriate intervals.

## **Storage**

The storage of medicines is the overall responsibility of the Mrs Gemma Lillywhite (headteacher) who will ensure that arrangements are in place to store medicines safely.

The storage of medicines will be undertaken in accordance with the *Managing Medicines in Schools and Early Years Setting* document and product instructions. Medicines should be stored in the original container in which they were dispensed.

It is the responsibility of all staff to ensure that the received medicine container is clearly labelled with the name of the child, the name and dose of the medicine and the frequency of administration.

It is the responsibility of the parents to provide medicine that is in date. This should be agreed with the parents at the time of acceptance of on-site administration responsibilities.

Medication will be stored in the main school office in the locked medicine cupboard. Inhalers and Epi Pens are stored in clearly labelled draw string bags in each classroom and each item is clearly labelled. These bags are taken out for PE lessons and taken to rooms where other lessons may be taking place e.g. music room. Packs for Diabetic pupils will be stored in pupil's classrooms under supervision of the class teacher, not in a locked cupboard, to allow for quick access should they be required. Any medication that requires refrigeration will be stored in a designated fridge in the medical room.

## **Disposal**

It is not the responsibility of St Mary's CE Junior School to dispose of medicines, except for the school's emergency inhaler. It is the responsibility of the parents to ensure that all medicines no longer required including those which have date-expired are returned to a pharmacy for safe disposal.

'Sharps boxes' will always be used for the disposal of needles. Collection and disposal of the boxes will be locally arranged as appropriate.
